Pruritus Symposium Münster

9th Münster Pruritus Symposium
Hybrid-Conference
September 20/21, 2024

Leonardo Campus
48149 Münster, Germany

Foreword

Dear Colleagues,

we cordially invite you to the [9th Münster Pruritus Symposium](#).

Chronic pruritus is a prevalent condition that is on the rise as a result of demographic shifts. The increasing demand from our patients to find causes and effective treatment remains largely unfulfilled.

Basic knowledge of the pathophysiology and etiology of pruritus is a prerequisite for successful clinical management, but a broad curriculum including basic knowledge of pruritus medicine into residency trainings or medical conferences is largely missing.

To close this gap, we regularly organize our interdisciplinary symposium and are pleased to invite you to the 9th Münster Pruritus Symposium (Hybrid Conference).

The symposium will be held once more in Münster, and internationally acclaimed experts will present translational aspects of research and care in their customary interactive manner.

We are looking forward to your participation!

Kind Regards

Univ.-Prof. Dr. med. Dr. h.c. Sonja Ständer
